

Hello,

We are pleased to inform you that we are the official vendor of AmiBroker for India. As you might be knowing, [AmiBroker](http://www.tradinganalysis.co.in) is the world's leading advanced **Technical Analysis** and renowned **Charting Software**. Kindly visit us online at <http://www.tradinganalysis.co.in> to know more about AmiBroker.

### Regarding AmiBroker Editions :

AmiBroker comes in 2 editions, Standard and Professional. While both editions have the capabilities to show real-time charts, AmiBroker Standard Edition lets you see real-time charts upto 1 min (smallest candle) and do corresponding analysis (Scanning / Exploration / Back-testing and Optimization). AmiBroker Professional does not have any such limitation and can let you see charts of any duration (5 sec., 15 sec., or even tick chart) and do corresponding analysis. There are other differences too and for detailed comparison, please visit <http://www.tradinganalysis.co.in/page.php?page=Version-Compare> At any time, you can upgrade from Standard Edition to Professional Edition.

AmiBroker is a non-subscription type of software meaning, once you purchase it, **it is yours for lifetime** and you don't have to pay any charges further for AmiBroker. But as every charting / analysis software needs data, AmiBroker too will need data to analyse upon. That will be the only recurring expense at your end.

### Real time Data for AmiBroker :

AmiBroker is used worldwide by a multitude of traders who trade on Stocks, Futures, Options, Currencies, ADRs, MFs, etc., hence AmiBroker has isolated itself from the data vending part. Each user subscribes for the data that he is interested in, from the data vendor of his choice and as per his requirements. Being one of the most popular charting and technical analysis software, each data vendor invariably has some dedicated procedure to import their data into AmiBroker.

Through our sister concern Global Financial Datafeeds LLP, we are **authorized distributor of NSE for realtime data of F&O Segment** (National Stock Exchange of India). The price of the data packages is as follows.

Package Description		Validity Period	Price (INR)
AmiBroker	Standard Edition	Lifetime	10046.00
	Professional Edition	Lifetime	14059.00
	Ultimate Pack Pro Edition	Lifetime	20621.00
nimbledataPro - Realtime and End-of-day data of NSE (F&O) Segment	1 month		2200.00
	2 months		4400.00
	3 months		6271.00
	6 months		11883.00 <b>(1980.00 pm)</b>
	12 months		21125.00 <b>(1760.00 pm)</b>

Please visit [Global Financial Datafeeds LLP \(GFDL\)](http://www.tradinganalysis.co.in) for more details about our data products.
